

SuperDrecksKëscht®

The 6 pillars:

LE GOUVERNEMENT
DU GRAND-DUCHÉ DE LUXEMBOURG
Ministère du Développement durable
(Pôle Infrastructure)
Administration de l'environnement

2nd pillar: Ecological waste management - certified according to DIN EN ISO 14024

Advice - Waste management concept

The strength of the *SuperDrecksKëscht® fir Betriber* is in providing practical advice and monitoring. The offer addresses institutions in the private and public sector as for instances companies and administrations but also construction sites and residential buildings. Advisors support these institutions by regular visits and training for their staff.

Prevention and recycling

The waste management concept designed together with the institution is based on the requirements of the company or the administration and includes waste prevention. Prevention is often easier than expected. Intelligent prevention concepts and separate collection lead to perceptible waste prevention and economic advantages.

Label awarding

Infrastructures which implement the concept *SuperDrecksKëscht® fir Betriber* and can demonstrate this extendedly by means of material flow balances are rewarded with the quality label, which is certified according to the international norm DIN EN ISO 14024.

Transparent waste transactions

... not only by the *SuperDrecksKëscht®*, but also by her partners from the waste management business. Environment, quality and safety - an intelligent management of these 3 aspects in the company contributes to the preservation of their own business basis.
