

The **solution** for climate protection and resource conservation in **your residence** !

SDK RESIDENZEN
SuperDrecksKëscht®

SDK Residenzen

SDK provides sustainability advice to **reduce your residual waste** and **increase climate and resource protection** through separate collection and waste prevention in your residence.

Your advantages with *SDK Residenzen*

You reduce your residual waste

You can conveniently dispose of your household waste

You make recycling possible through waste sorting

You save 20 - 40% of your costs by reducing the amount of residual waste

You use a safe and clean garbage room

In compliance with the Waste Management Law of 21 March 2012

Coordinated with the *Chambre Immobilière du G.-D.* and the *Groupement des Syndicats Professionnels du Luxembourg*

Your *SDK Residenzen* service

The *SDK Residenzen* team offers you the following **free services** :

1. **Advice** to the property management or homeowners' association
2. **Inventory** and analysis of local conditions
3. **Simulation** of the saving potential

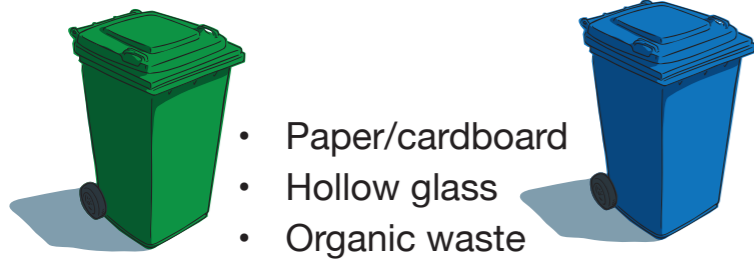

4. **Development of a collection and disposal concept** based on local conditions
5. **Briefing** of the residents and **training** of the maintenance staff
6. Continuous **support** of the residence
7. **SDK label awarded** for exemplary action

The collection concept

Municipal collection of recyclable materials

- Paper/cardboard
- Hollow glass
- Organic waste

Valorlux (packaging)

- Plastic bottles
- Metal packaging
- Beverage cartons
- Plastic films and bags
- Plastic pots, cups and bowls

SuperDrecksKëscht®

Collections via SDK® fir Bierger, resource centres (recycling centres) and door-to-door waste collections (4x/year)

Dispose of dry batteries according to the safety concept.

Medicine, aerosol cans,
Ink and toner cartridges,
Cooking oils and fats,
Hazardous material packaging,
Fluorescent lamps,
Energy-saving light bulbs,
Small electrical appliances,
Paint / Varnish

The **SDK Residenzen** concept is composed of several modules that enable optimal waste collection.

Residual waste disposal

Is anything left ?

The smart waste container makes an optimal residual waste collection possible.

The smart waste container saves costs and protects the climate

Add a smart waste container to your waste collection station.

The smart waste container has been specifically designed for waste collection in residences. It registers how often a resident uses it - a system with many advantages.

This achieves :

- at least 50% less residual waste, while saving resources and protecting the climate,
- lower waste fees, simple handling,
- billing according to the polluter pays principle (pollueur-payeur),
- individual billing,
- safe data transmission,
- solution for indoor and outdoor use

SDK label for exemplary action

On the initiative of the residents, the *Conseil syndical* or the property management, your residence can also obtain the SDK label.

The label is an ISO 14024 certified quality label for environmentally sound management of waste management.

You need a separate waste collection system of the different waste products and its documentation.

A certification label attests :

- convenient and simple waste collection
- a safe and tidy garbage room
- cost savings
- collection and disposal in compliance with the law
- climate protection

The SDK label - an award for commitment to resource and climate protection to make all residents proud !

Tips for climate and resource protection for your everyday life

Conserving resources while shopping

When shopping, try to buy products that:

- have no / sustainable packaging
- have little or no pollutants
- are sustainable and environmentally friendly
- reusable

Look out for **quality labels** such as „Clever

Akafen“ and use **reusable systems** such as Ecobox¹, Superbag² and Öko-Tut³.

What to do at home

Collect all waste separately that does not belong in the residual waste.

Proper sorting in the garbage room

Put your waste in the right containers and do your part to protect the climate and resources.

Handling residual waste

For the remaining residual waste, use the black bin or the smart waste container if available.
