

Roofing - Resources potential

Product recipient :
Recyfuel, B-Engis
www.recyfuel.be

+

Wood chips (necessary for the production of the substitute fuels)

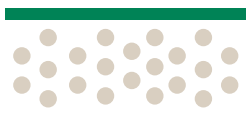

- Raw material use:
 - preparation for reuse
 - material recycling

- Energetic use:
 - production of a substitute combustible
 - energetic recovery

- Landfill / incineration / losts:
 - landfill
 - incineration
 - losts

Most important output streams

Raw material use:

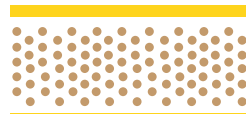

Aluminium part made of Resofuel

Energetic use:

Resofuel (Substitute fuel)

Plastifuel (Substitute fuel)
